

AI-Empowered SAFe Product Owner/Product Manager (6.0)

Duration: 2 days

Audience: Chargé de projet

Who is this training for?

- Agile Project Managers
- Scrum Masters
- Product Owners
- Development Team Members: Beginners, Intermediate, or Advanced

Training objectives

Develop the skills necessary for the role of Product Owner and Product Manager in the context of Lean-Agile transformation.

Summary

This training, which is very focused on interaction, allows you to successfully pass the SAFe PO/PM (6.0) certification. Through a series of lectures and practical exercises, participants prepare for the POPM exam and receive coaching from the trainer. The AI-Empowered approach aims to strengthen the practice of SAFe by integrating artificial intelligence as a lever for understanding, efficiency and decision-making, while respecting Lean-Agile principles and human responsibilities. NB: We always provide the most up-to-date version of the training.

Course outline

- Lesson 1: Becoming a SAFe Product Owner or Product Manager in a SAFe Company
- Lesson 2: Preparing for PI Planning
- Lesson 3: Planning a PI
- Lesson 4: Executing Iterations
- Lesson 5: Executing a PI

Approach and methodology

Exercises/workshops, personalized coaching of the trainer, lectures, exchanges and examples on cases.

Prerequisites

Agile Project Management - The Basics OR Agile Certification (ACP, PSM, CSM, DASM, etc.)

Recommendations

Working in a context of Lean-Agile transformation
