

Becoming a Microsoft Teams and Microsoft 365 Champion

Duration: 5 half-days

Audience: Pour tous

Who is this training for?

- Team leader who wants to improve collaboration
- Employee looking to learn about the main tools of Microsoft 365
- Help desk employee who wants to better understand the user experience

Training objectives

The modules offer complementary content that aims to gradually deepen the knowledge of the tools so that you can, at the end of the course, be in a position to confidently determine the most relevant tools for your needs and those of your team.

Summary

Microsoft 365 offers more than cloud tools. Microsoft 365 offers opportunities to improve your efficiency and transform your traditional ways into modern collaboration practices. In addition to allowing anytime, anywhere access to your crucial information through mobility, it simplifies business processes and the management of your daily activities. In this journey, you'll learn, step-by-step, how to take advantage of the many Microsoft 365 tools built into Teams. Plus, you'll learn how to foster collaboration with tools like OneDrive, team sites, Teams, and OneNote. You'll experiment with new personal and team management tools like Planner and To Do and we'll show you how to take advantage of mobile tools in your travel and remote work.

Course outline

- Learn other possible interactions

Approach and methodology

Our small group training strategy aims to:

- Allow you to interact with the trainer
- Give you the ability to experiment with all the tools without restriction

The course of the modules is highly interactive which allows:

- To increase the level of engagement of the participants.
- To share and learn from the experience of other participants
- To use concrete examples that are easily transferable to the workplace

Prerequisites

Be a user of Microsoft cloud tools, including Teams, with a desire to improve your knowledge of Microsoft 365 collaboration and sharing tools.

Recommendations

Knowledge of the Microsoft 365 environment (including OneDrive and Teams) is highly recommended.
