

Configure and Govern Entitlement with Microsoft Entra ID (SC-5008)

Duration: 1 day

Audience: Professionnel TI

Who is this training for?

- Administrators and systems engineers responsible for identity and access management in Microsoft environments.
- IT security professionals responsible for access governance, compliance, and the protection of sensitive data.
- Security operations analysts who want to deepen their knowledge of identity management with Microsoft Entra ID.
- Cloud architects and cloud specialists who design or manage access policies in Microsoft 365 and Azure.

Training objectives

- Automate access assignment
- Manage the identity lifecycle
- Enforce governance and compliance policies
- Use advanced features such as Entitlement Management and Access Reviews

Summary

Use Microsoft Entra to manage access using access rights, access reviews, privileged access tools, and to monitor access events.

Course outline

- Plan and implement entitlement management
- Plan, implement, and manage access reviews
- Monitor and maintain Microsoft Entra ID
- Plan and implement privileged access

- Explore the many features of Microsoft Entra Permissions Management

Approach and methodology

Practical and structured approach combining focused theory and guided workshops.

Participants gradually configure and manage rights with Microsoft Entra ID through concrete exercises inspired by professional scenarios, promoting immediate application of learning. They learn how to manage identities, control access, and implement security strategies that are appropriate for cloud environments.

Led by a Microsoft certified trainer, the training focuses on interactivity and the development of directly transferable technical skills to effectively secure access to resources in a professional context.

Prerequisites

- Basic knowledge of Azure administration.
- Ability to create users and groups using Microsoft Entra.

Recommendations

- Knowledge of security and access management concepts Be comfortable with Microsoft 365 / Azure environments
- Understand access governance concepts (lifecycle, permissions) Have experience in administration or IT security (asset)
