

Create and Manage Automated Processes by using Power Automate (PL-7002)

Duration: 1 day

Audience: Professional TI

Who is this training for?

This course is intended for mid-level business users, business analysts, and low-code solution builders who want to automate business processes using Power Automate. It is suitable for those responsible for optimizing workflows, automating approvals, and integrating data between different systems, and who have a basic understanding of the Power Platform and the fundamental concepts of Power Automate.

Training objectives

- Create triggers for cloud flows • Configure actions
- Implement conditional logic for a cloud flow
- Test a cloud flow
- Create and configure approvals using Power Automate
- Share cloud flows

Summary

Applied Skills training courses are designed to validate specific skills by being oriented towards real-world scenarios. They offer a targeted alternative to traditional role-based certifications, with a focus on applying technical skills in real-world business situations. Get started with Power Automate by creating and managing automated processes with Power Automate. Including creating triggers for cloud flows, setting up actions, implementing conditional logic for a cloud flow, testing a cloud flow, creating and configuring approvals using Power Automate, and sharing cloud flows.

Course outline

- Get started with Power Automate
- Create approval flows with Power Automate
-

Create flows to manage user information

- Deep integration of Power Automate across multiple data sources
- Guided project: Create and manage automated processes with Power Automate

Approach and methodology

The course focuses on a hands-on approach to process automation, combining short lectures, demonstrations and progressive exercises. Participants design, test, and share cloud flows based on realistic use cases, including approvals and conditional logic. The pedagogical approach promotes the optimization of business processes, the integration of multiple data sources and the rapid upskilling of Power Platform users.

Recommendations

- Fundamental understanding of Power Platform
- Basic understanding of Power Automate

Certifications

- Exam/assessment: Assessment Applied Skills – PL-7002 • Certification obtained: Microsoft Applied Skills: Create and manage automated processes with Power Automate
- Note: Recognition focused on the real-world application of skills, complementary to Power Platform certifications.
