- Protection and Compliance Analysts or Managers Anyone involved in implementing data protection policies with Microsoft Purview

Training objectives

- Understand the concepts of information protection and data loss prevention (DLP) in Microsoft Purview
- Identify, classify, and protect sensitive information in Microsoft 365
- Create and manage sensitive information types and sensitivity labels
- Implement auto-labeling policies to protect data
- Design, deploy, and adjust data loss prevention (DLP) policies
- Monitor, analyze and improve data protection within the organization

Summary

Gain the skills to use Microsoft Purview to improve the security of your data in Microsoft 365. In this course, you will learn how to create sensitive information types, create sensitivity labels, and use auto-labeling strategies based on those labels. You will also learn how to configure Data Loss Prevention (DLP) policies to protect your organization's data.

Course outline

- Create and manage sensitive information types
- Create and configure sensitivity labels with Microsoft Purview
- Prevent data loss in Microsoft Purview

- Implement information protection and data loss prevention with Microsoft Purview

Approach and methodology

Practical and structured approach combining focused theory and guided workshops.

Participants gradually implement information protection and data loss prevention with Microsoft Purview through real-world exercises inspired by professional scenarios, promoting immediate application of learnings. They learn how to classify data, set protection policies, and ensure compliance while reducing the risk of information leaks.

Led by a Microsoft-certified trainer, the training focuses on interactivity and the development of directly transferable technical skills to secure and govern data in a professional context.

Prerequisites

Hands-on experience in Microsoft 365 administration or IT security Knowledge of data governance and regulatory compliance issues

Recommendations

- Basic understanding of Microsoft 365 products and services.
- Familiarity with Microsoft Purview.
- An understanding of data security concepts.
