

Lean Six Sigma - White Belt

Duration: 1 day

Audience: Pour tous

Who is this training for?

This training is aimed at all managers and professionals who are involved, directly or indirectly, in improving the efficiency and quality of their services.

Training objectives

- Familiarize yourself with the Lean Six Sigma approach, its philosophy, principles and concepts.
- Understand the benefits of a reorganization of work in line with Lean principles.
- Assess the potential for applying this approach within your organization.

Summary

The white belt training is an introduction to the Lean philosophy and the Six Sigma methodology, aimed at familiarizing participants with the principles of continuous improvement and process optimization. Familiarize yourself and see for yourself how integrating Lean tools can optimize your workplace.

Approach and methodology

The training lasts 7 hours. These training days are based on an alternation of theoretical learning and practical applications. During these trainings, using examples, practical exercises and case studies, you will practice applying the tools commonly used to illustrate concepts and ensure their understanding. The preferred facilitation style is based on the sharing of individual experiences as well as interactions between participants. A certificate will be given to the participant at the end of the training.

Recommendations

- Understand the basics of the Lean culture
- Be called upon to contribute to continuous improvement projects
