

Risk management in projects

Duration: 2 days

Audience: Chargé de projet

Who is this training for?

Project managers: beginners, intermediate, or advanced.

Training objectives

- Be able to effectively plan and monitor project risks.
- Adopt a structured and integrated approach to risk management, aligned with the PMI.
- To equip ourselves with a common vocabulary.

Summary

This training, which is very focused on practice and interaction, allows students to understand and apply the best practices of risk management according to the Project Management Institute (PMI) approach. With the help of a practical case, the participants work in teams, through the 5 groups of processes and benefit from the coaching of the trainer.

Course outline

- Definitions • Risk management planning
- Risk identification
- Qualitative/quantitative risk analysis
- Risk response planning
- Implementation of risk response plans
- Risk monitoring and control
- Practical case study with exercises, workshops, simulations, role plays

Approach and methodology

Participants will complete a series of exercises/workshops and benefit from personalized coaching from the trainer. In addition, the latter will provide all the necessary explanations in the form of lectures, exchanges and examples on real life cases.

Prerequisites

Project Management - The Basics or Equivalent Content.
